

TRUSTED BY

DEFENSE SOLUTIONS

TRUSTED ON THE GROUND, FOR SAFETY IN THE SKY

From routine line maintenance to complex heavy maintenance, our height safety platforms deliver secure, efficient access to all areas of your aircraft. Designed for both fixed-wing and rotary aircraft, these platforms provide unmatched stability and versatility, ensuring every inspection and repair is completed safely, quickly, and with ease.

PROVIDING TRUSTED HEIGHT ACCESS SINCE 1997

Here at SafeSmart, we have extensive experience in various industries and our process is designed to provide the best possible results for our customers.

With our years of experience, SafeSmart will work with you to achieve the optimum height access solutions to improve your safety and efficiency.

WHY CHOOSE US?

We have provided expertly crafted high access solutions since our humble beginnings in 1997, serving high-profile clients across the globe.

DEPLOYABLE SOLUTIONS

ROLLUP EDGE PROTECTION

For quick and easy maintenance access, SafeSmart's Edge Protection is an industry leading solution that allows for efficient work performance around heavy machinery - allowing maintenance teams to work safely without being tied off.

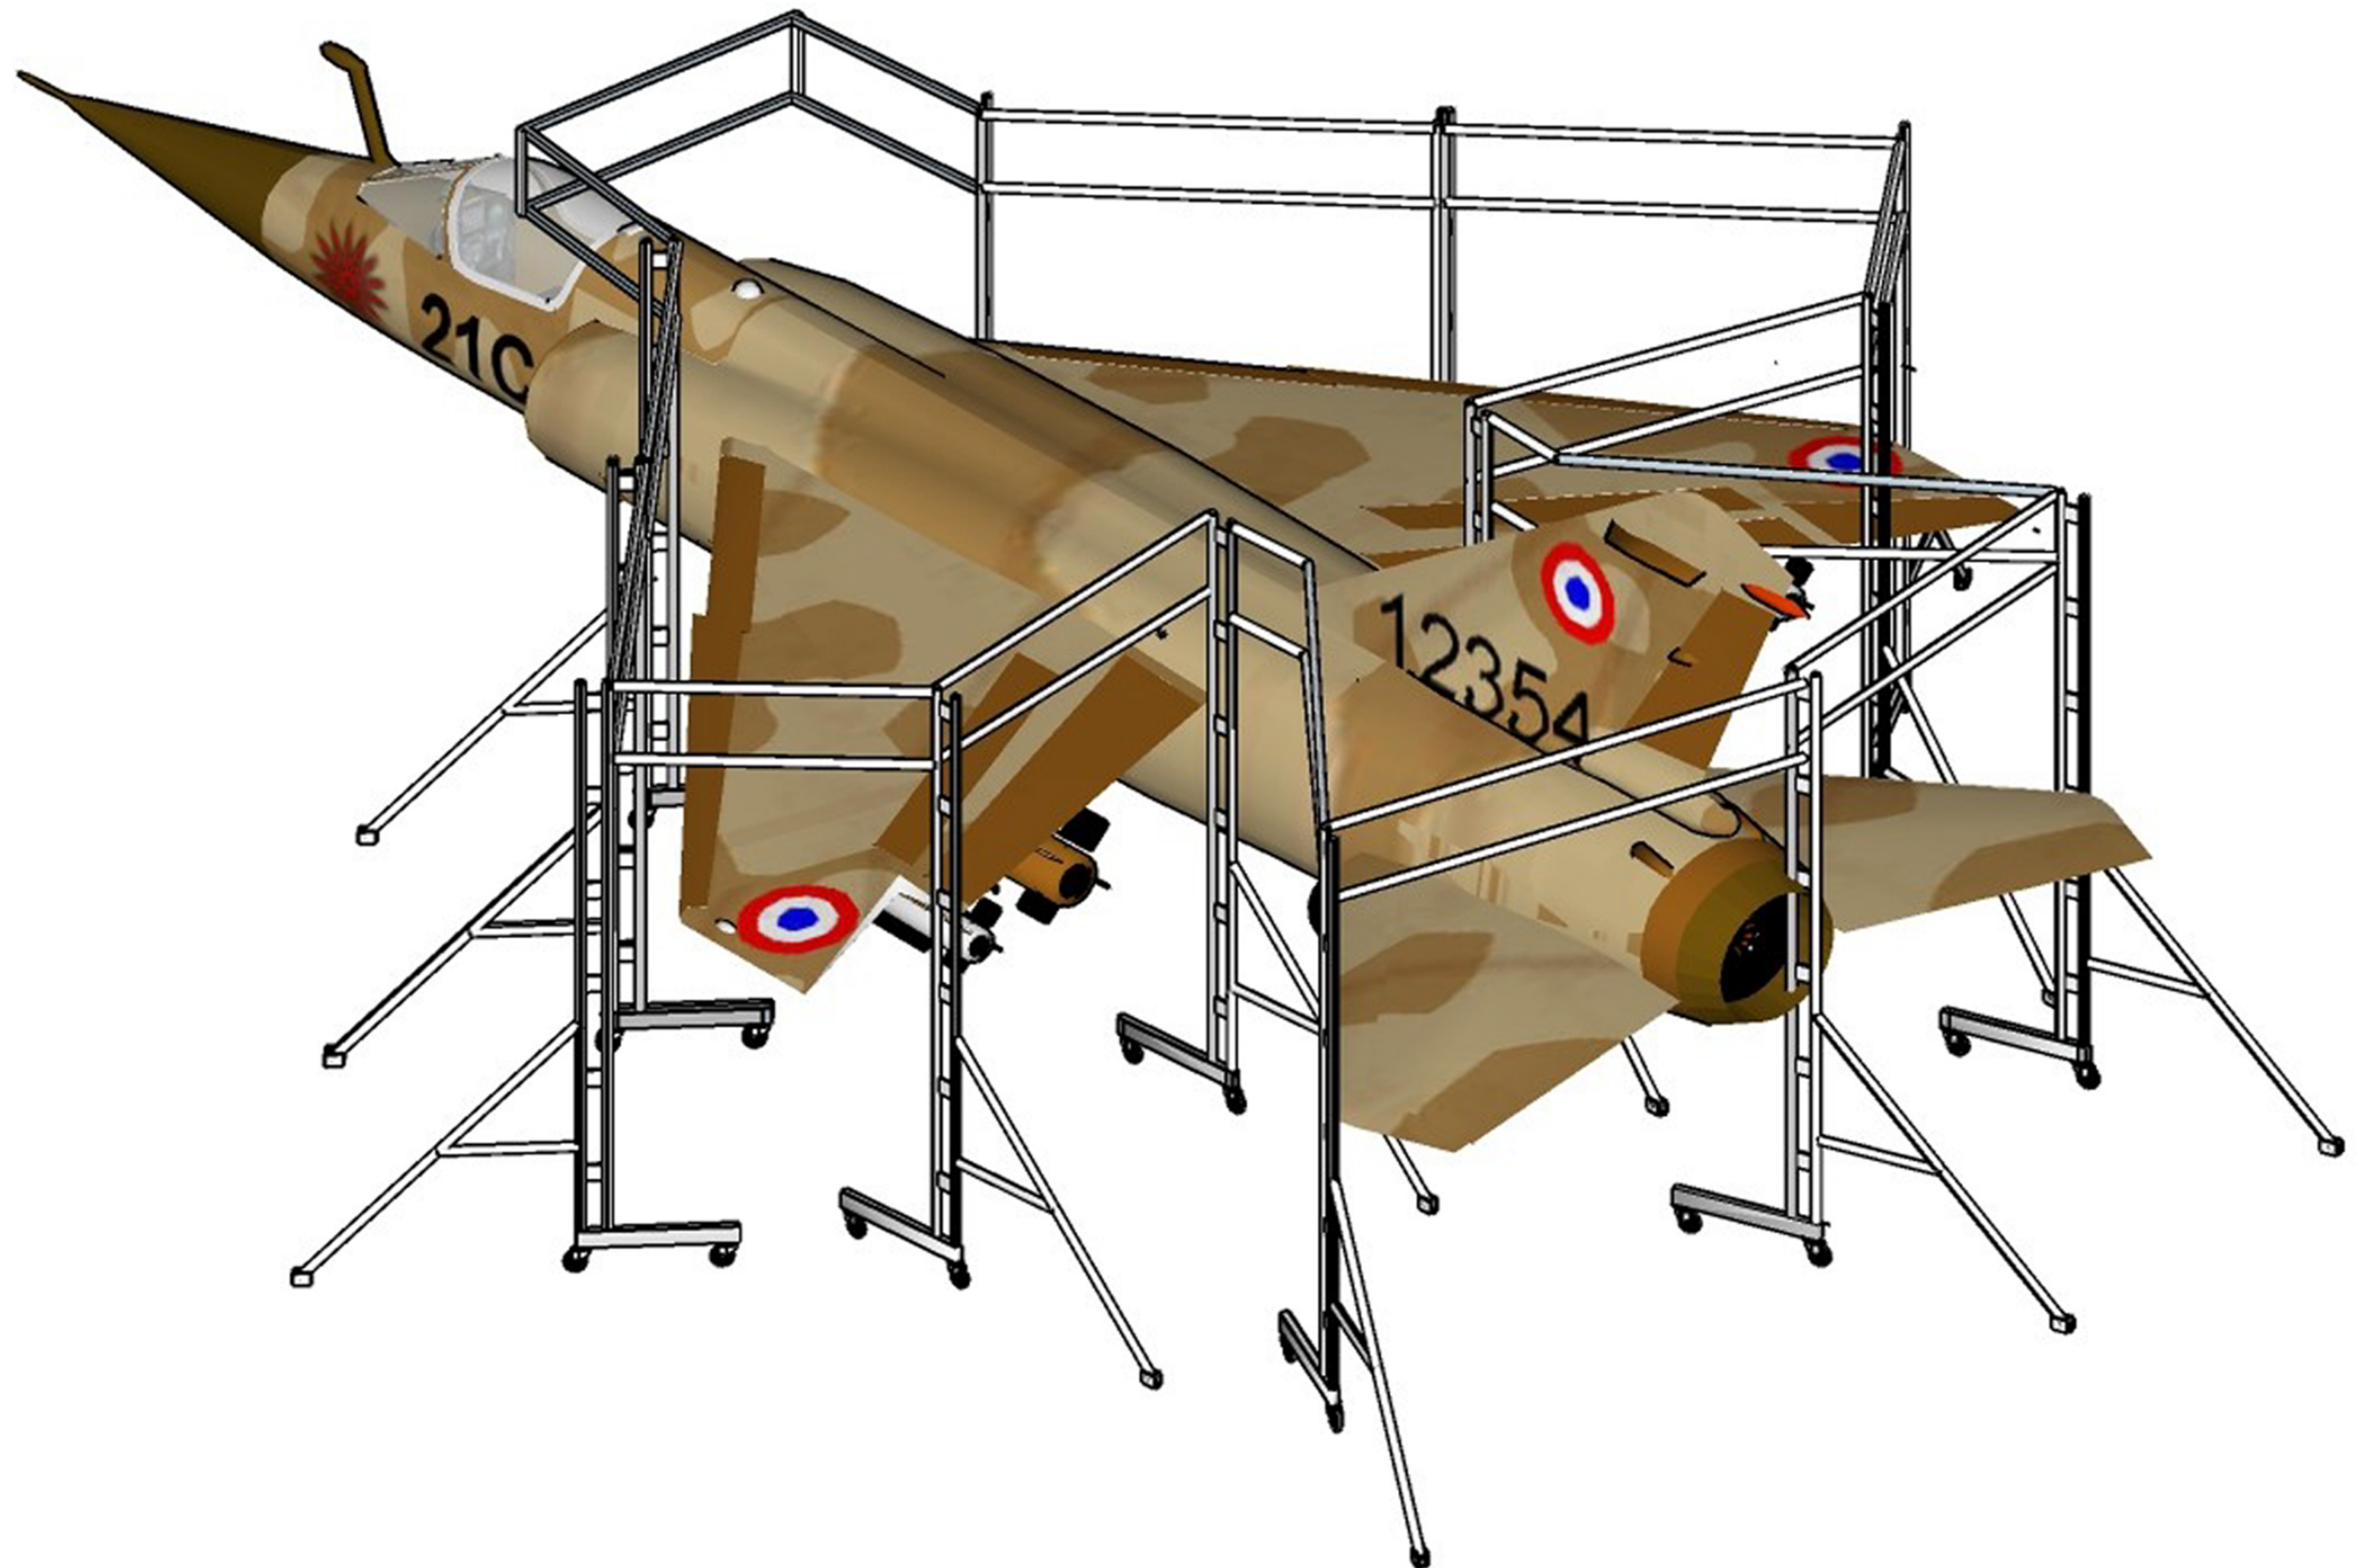

LIMITLESS CONFIGURATIONS

Regardless of the complexity of your equipment, SafeSmart Edge Protection adapts to meet your needs.

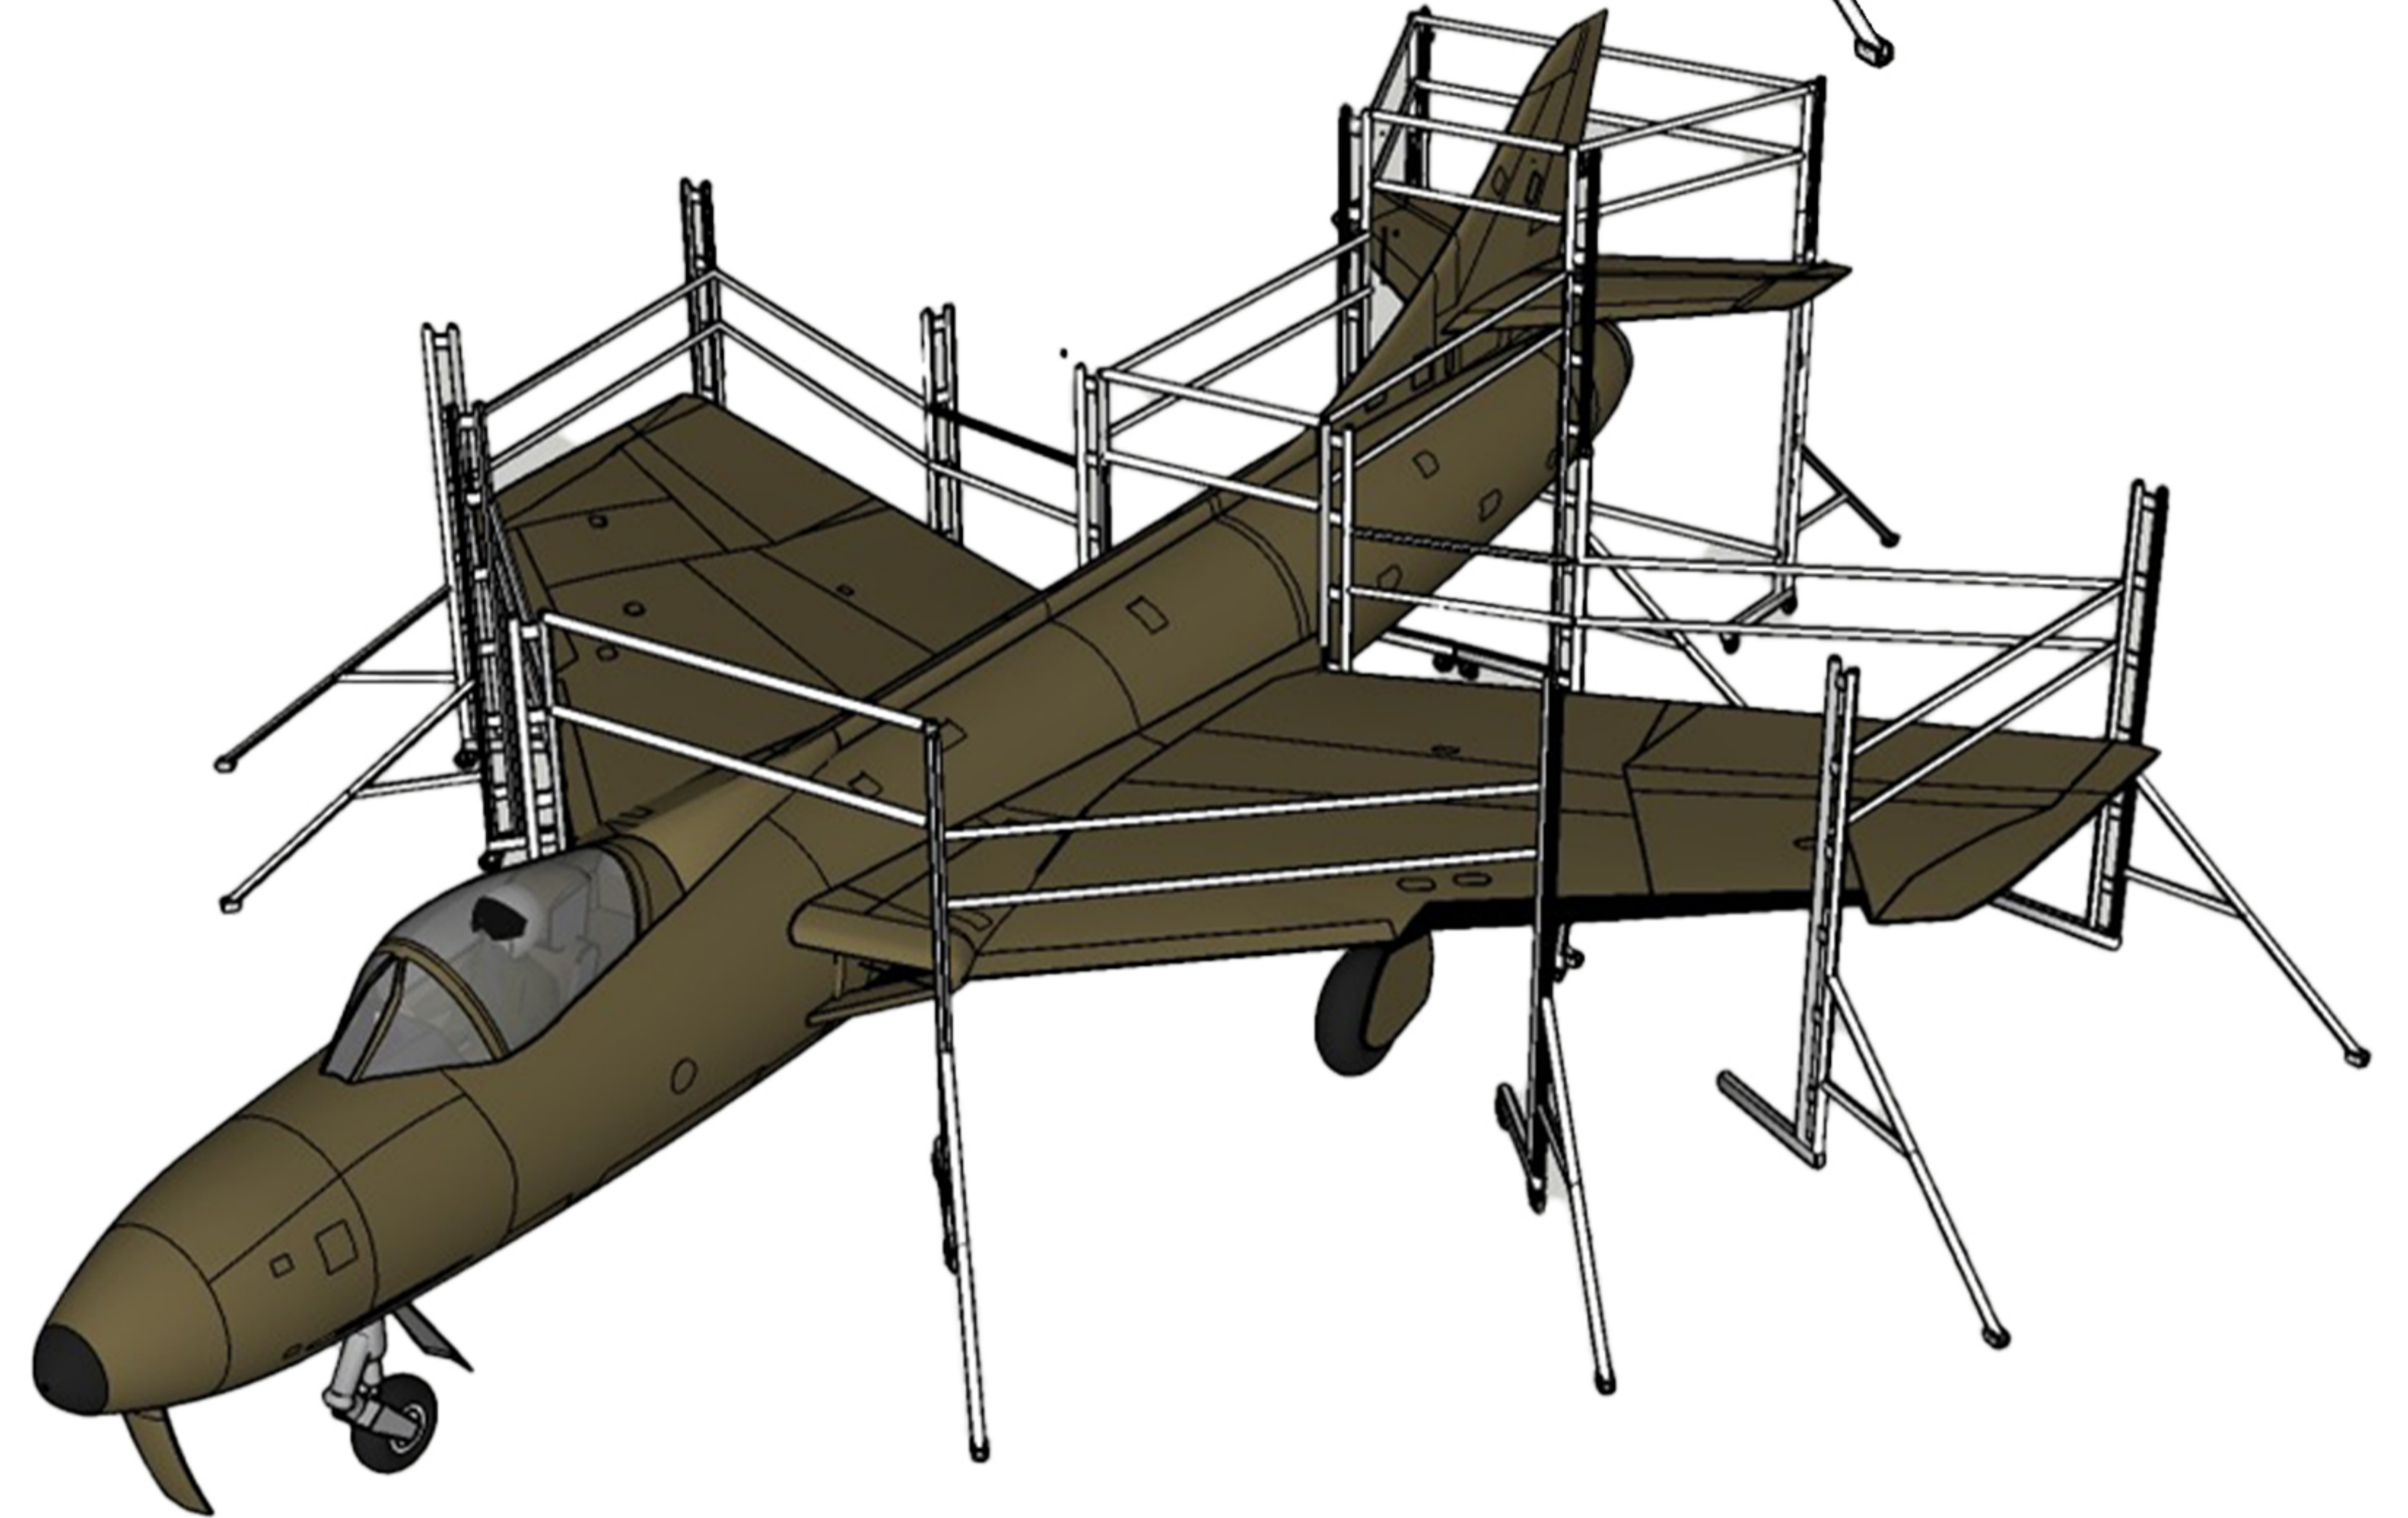

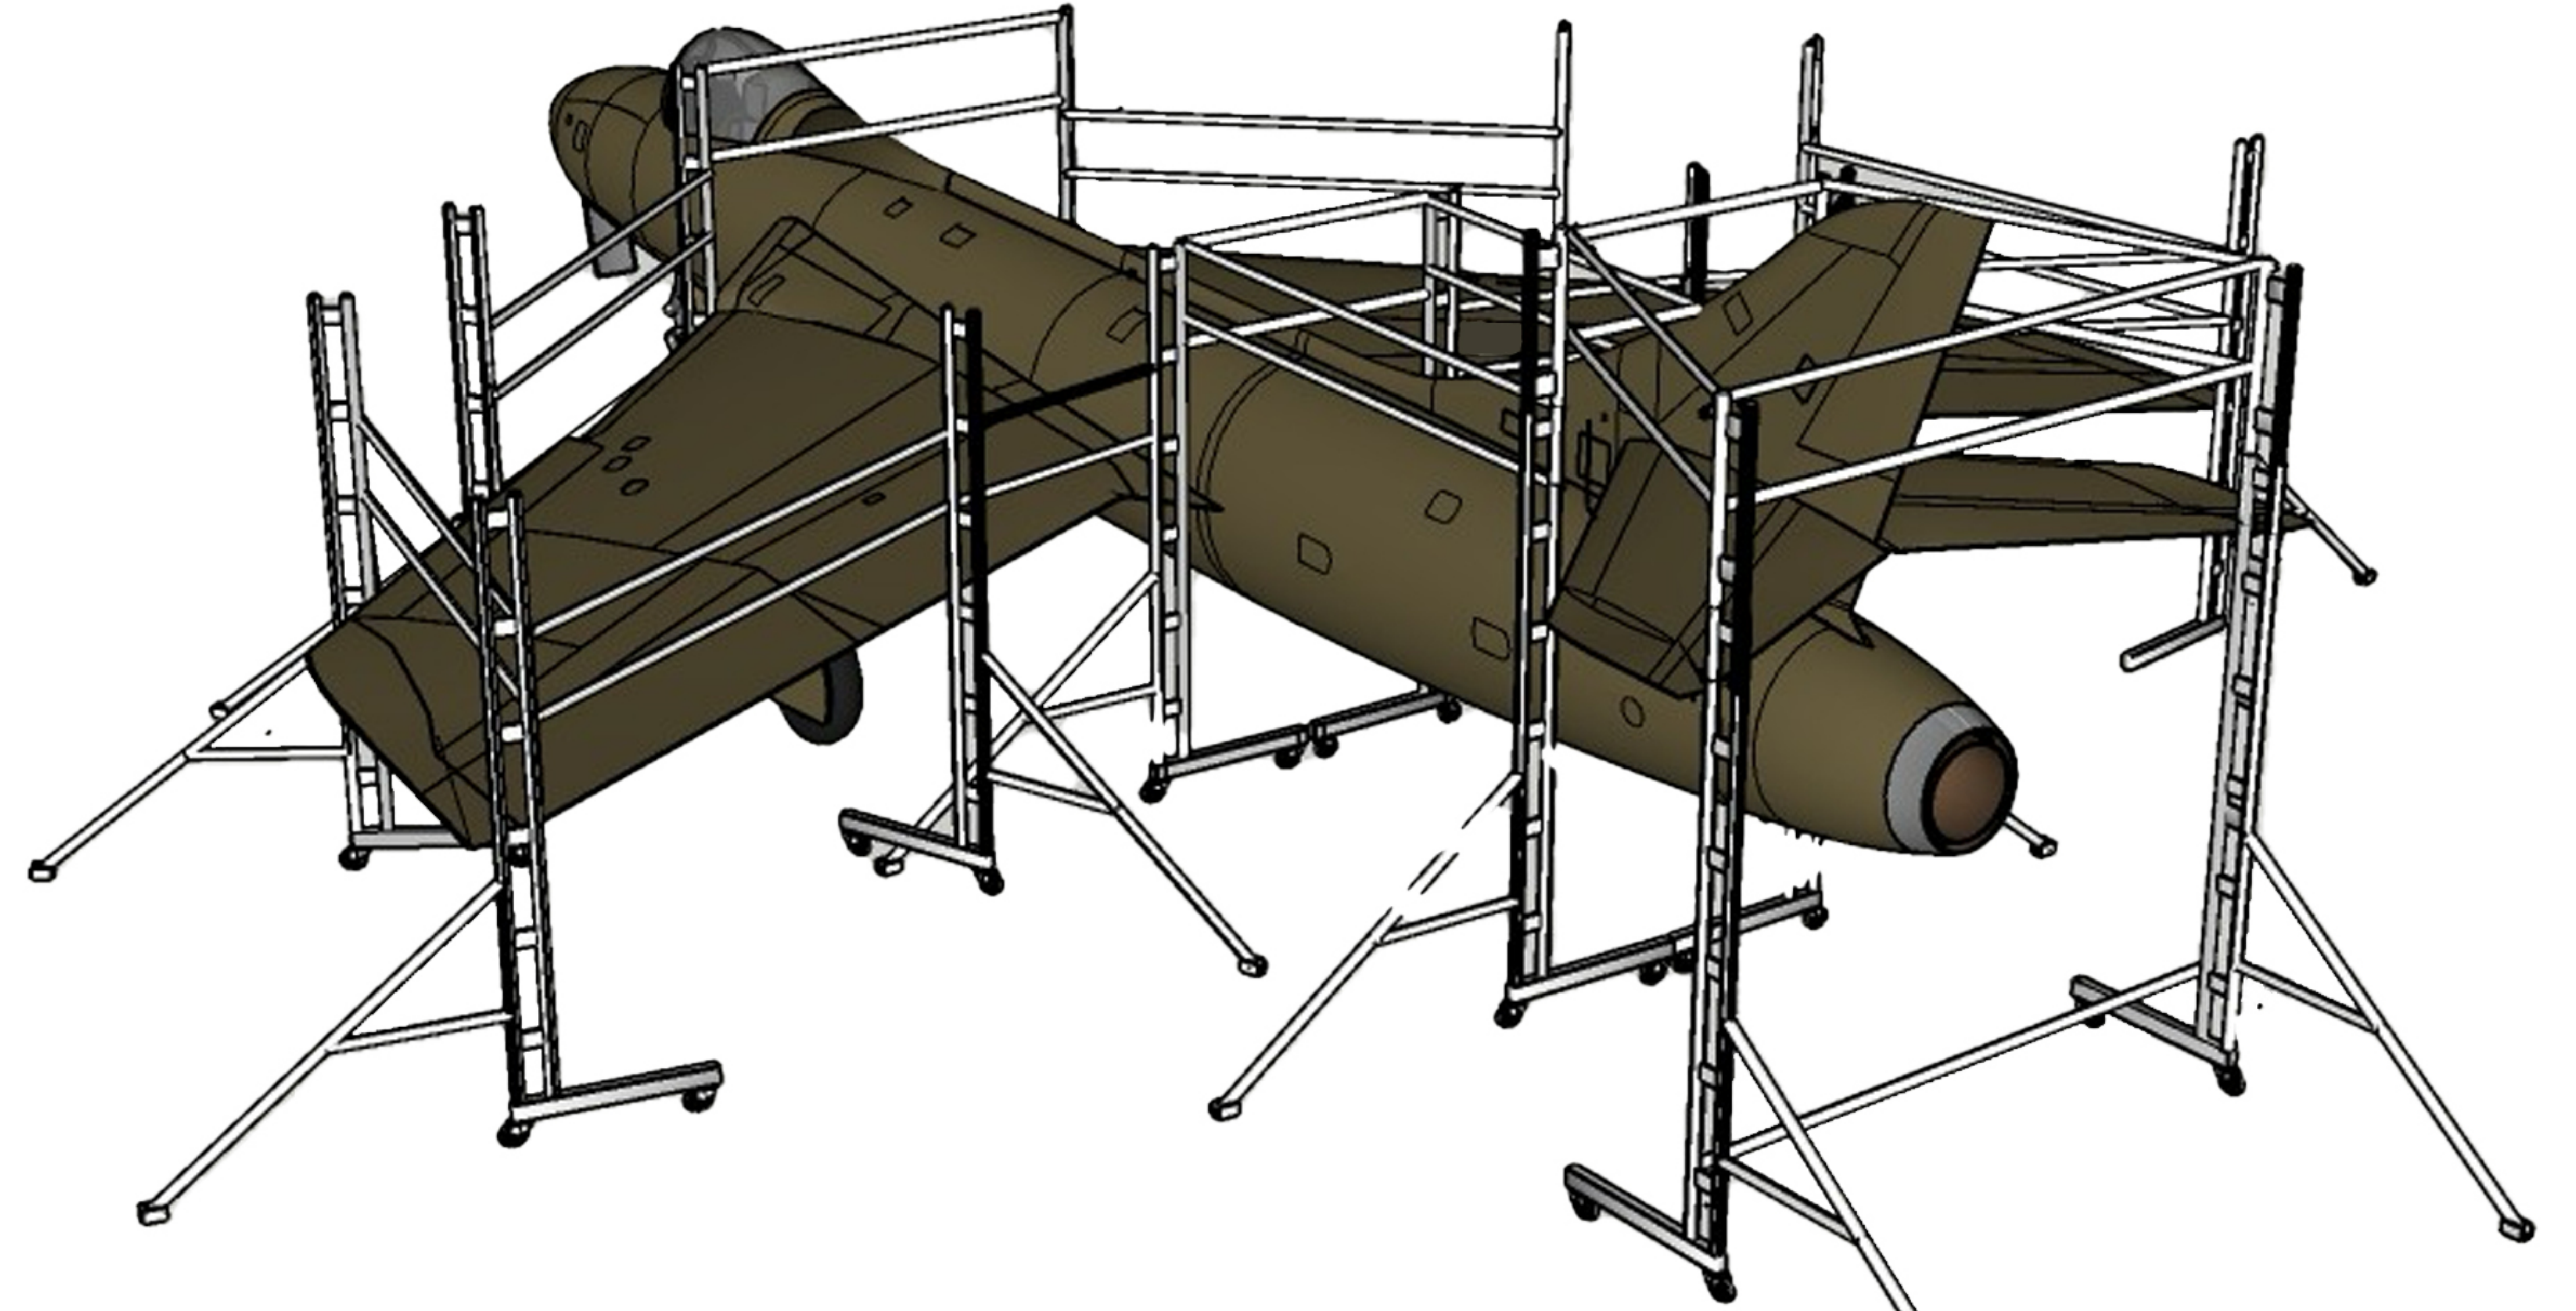

EASY STORAGE

SafeSmart Edge Protections packs down into small proportions for easy storage and transportation.

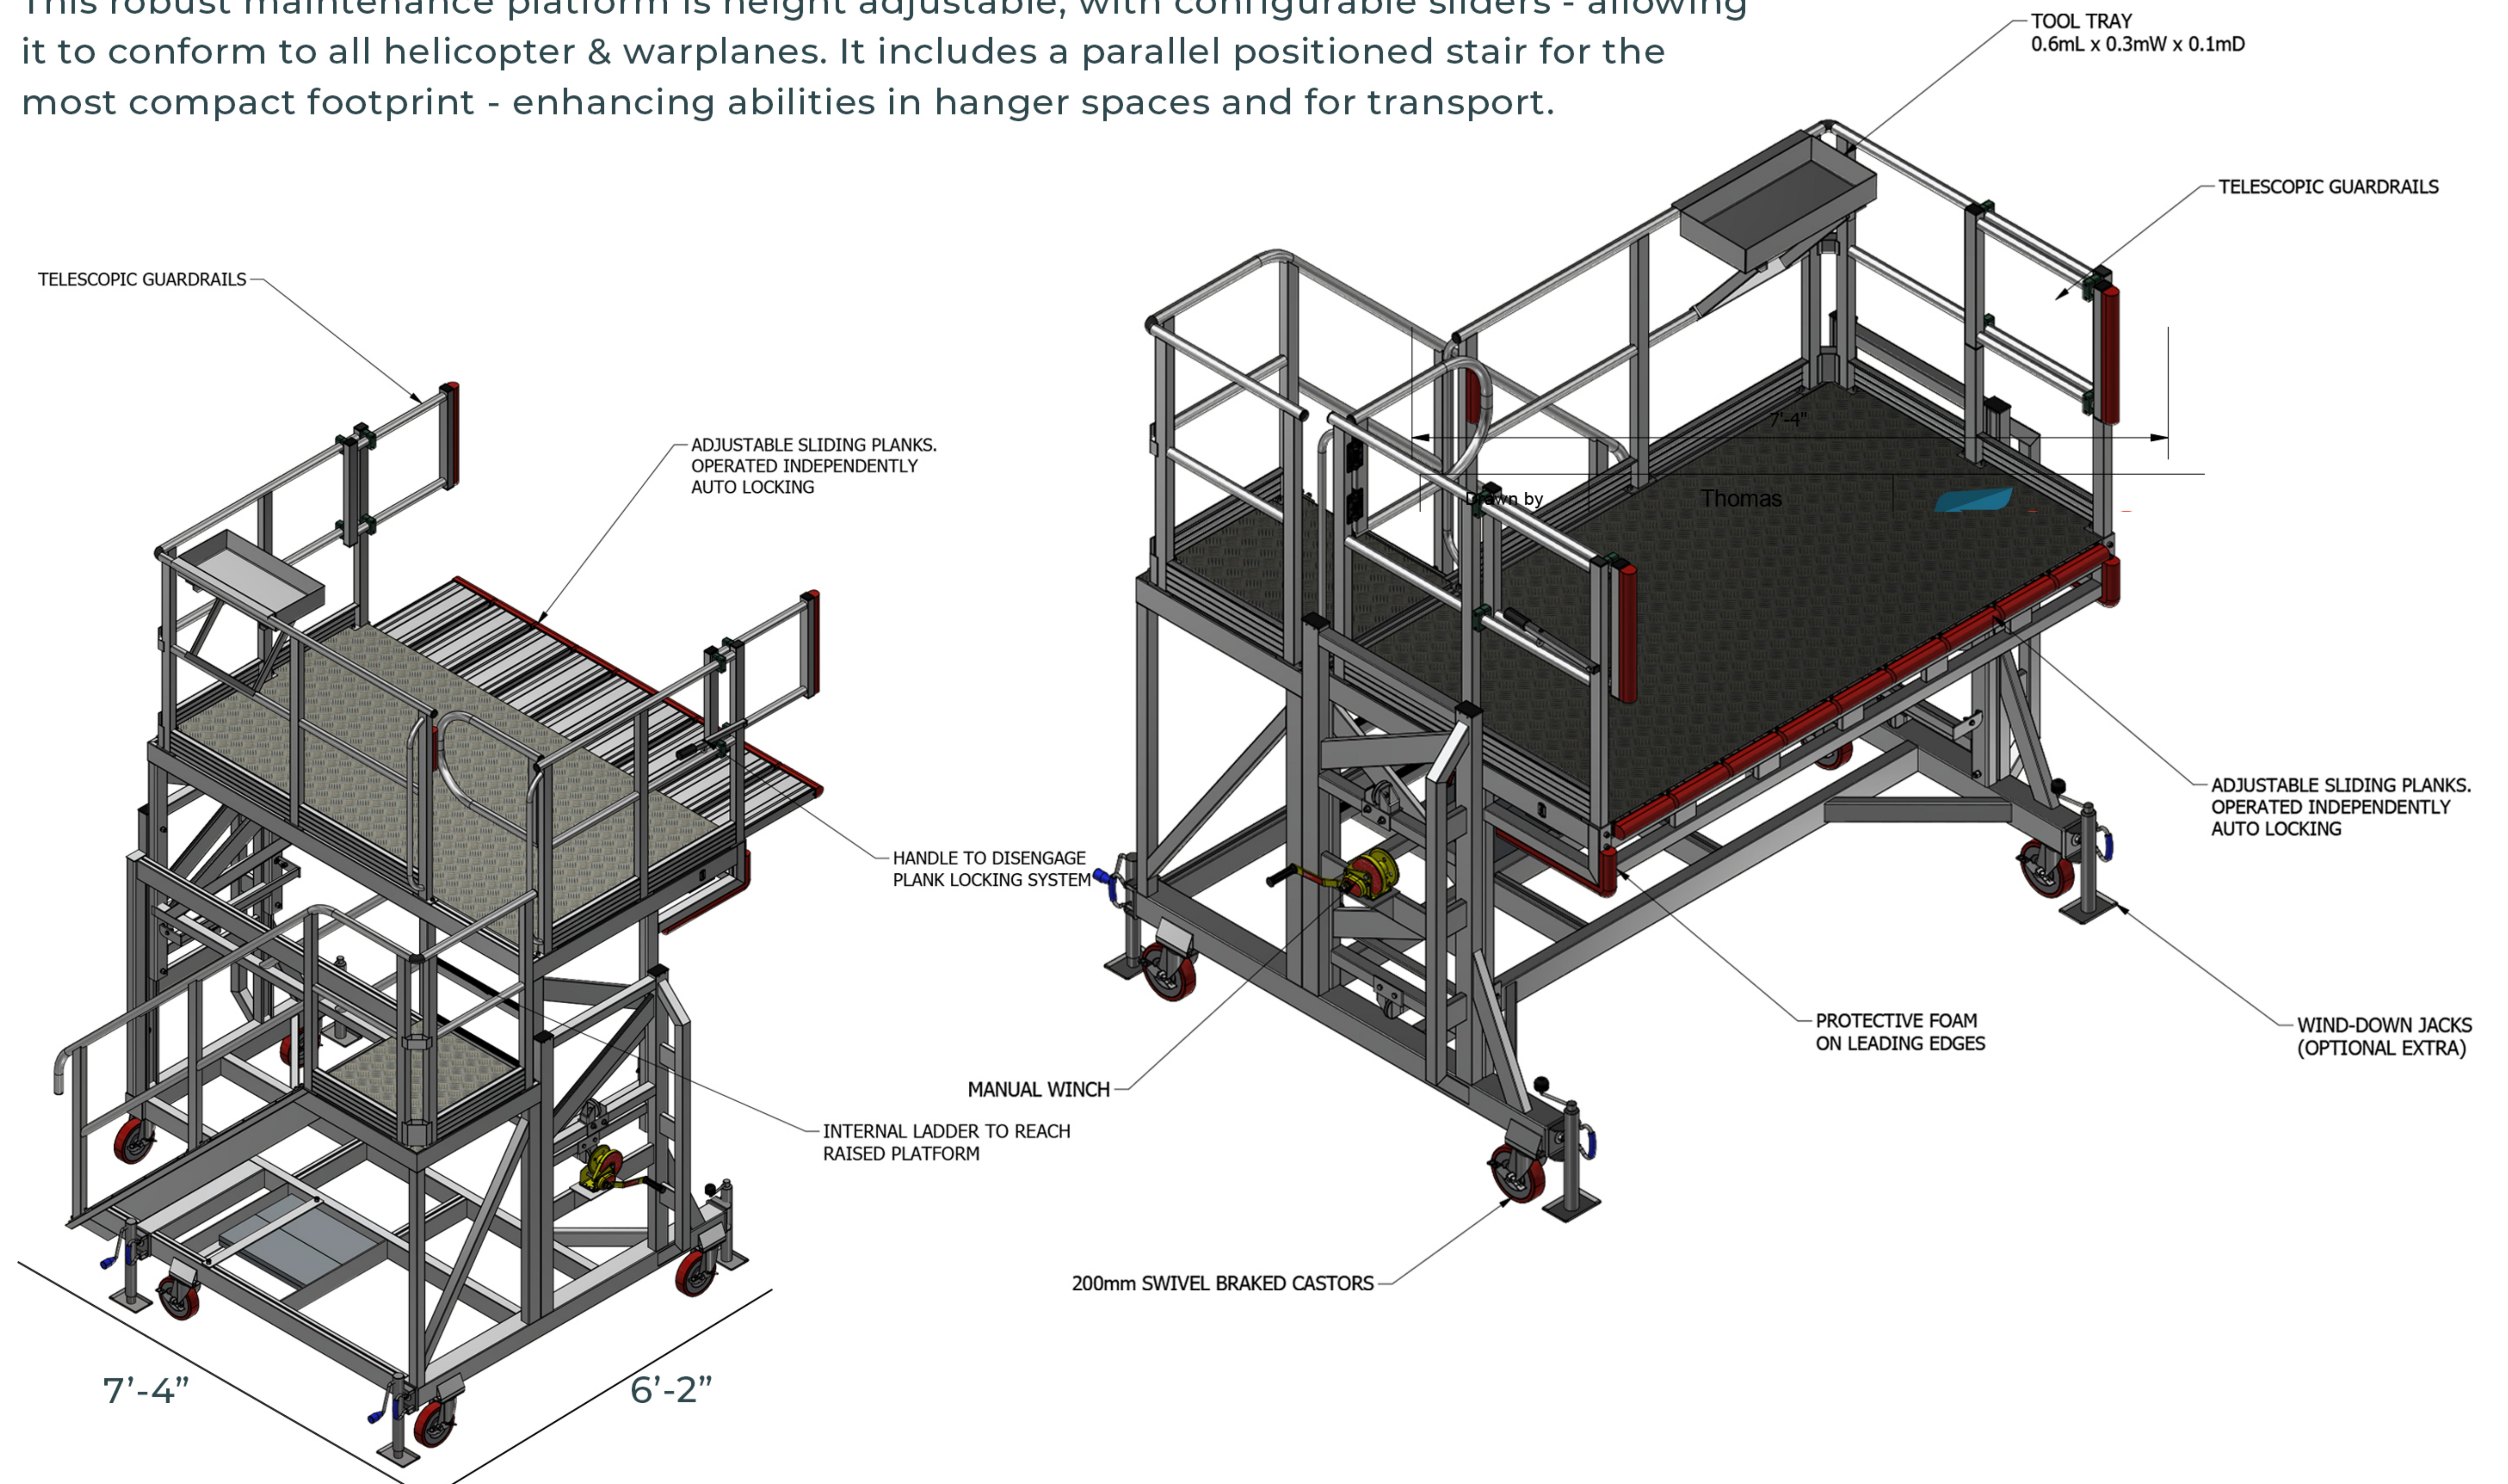

In-Situation Examples

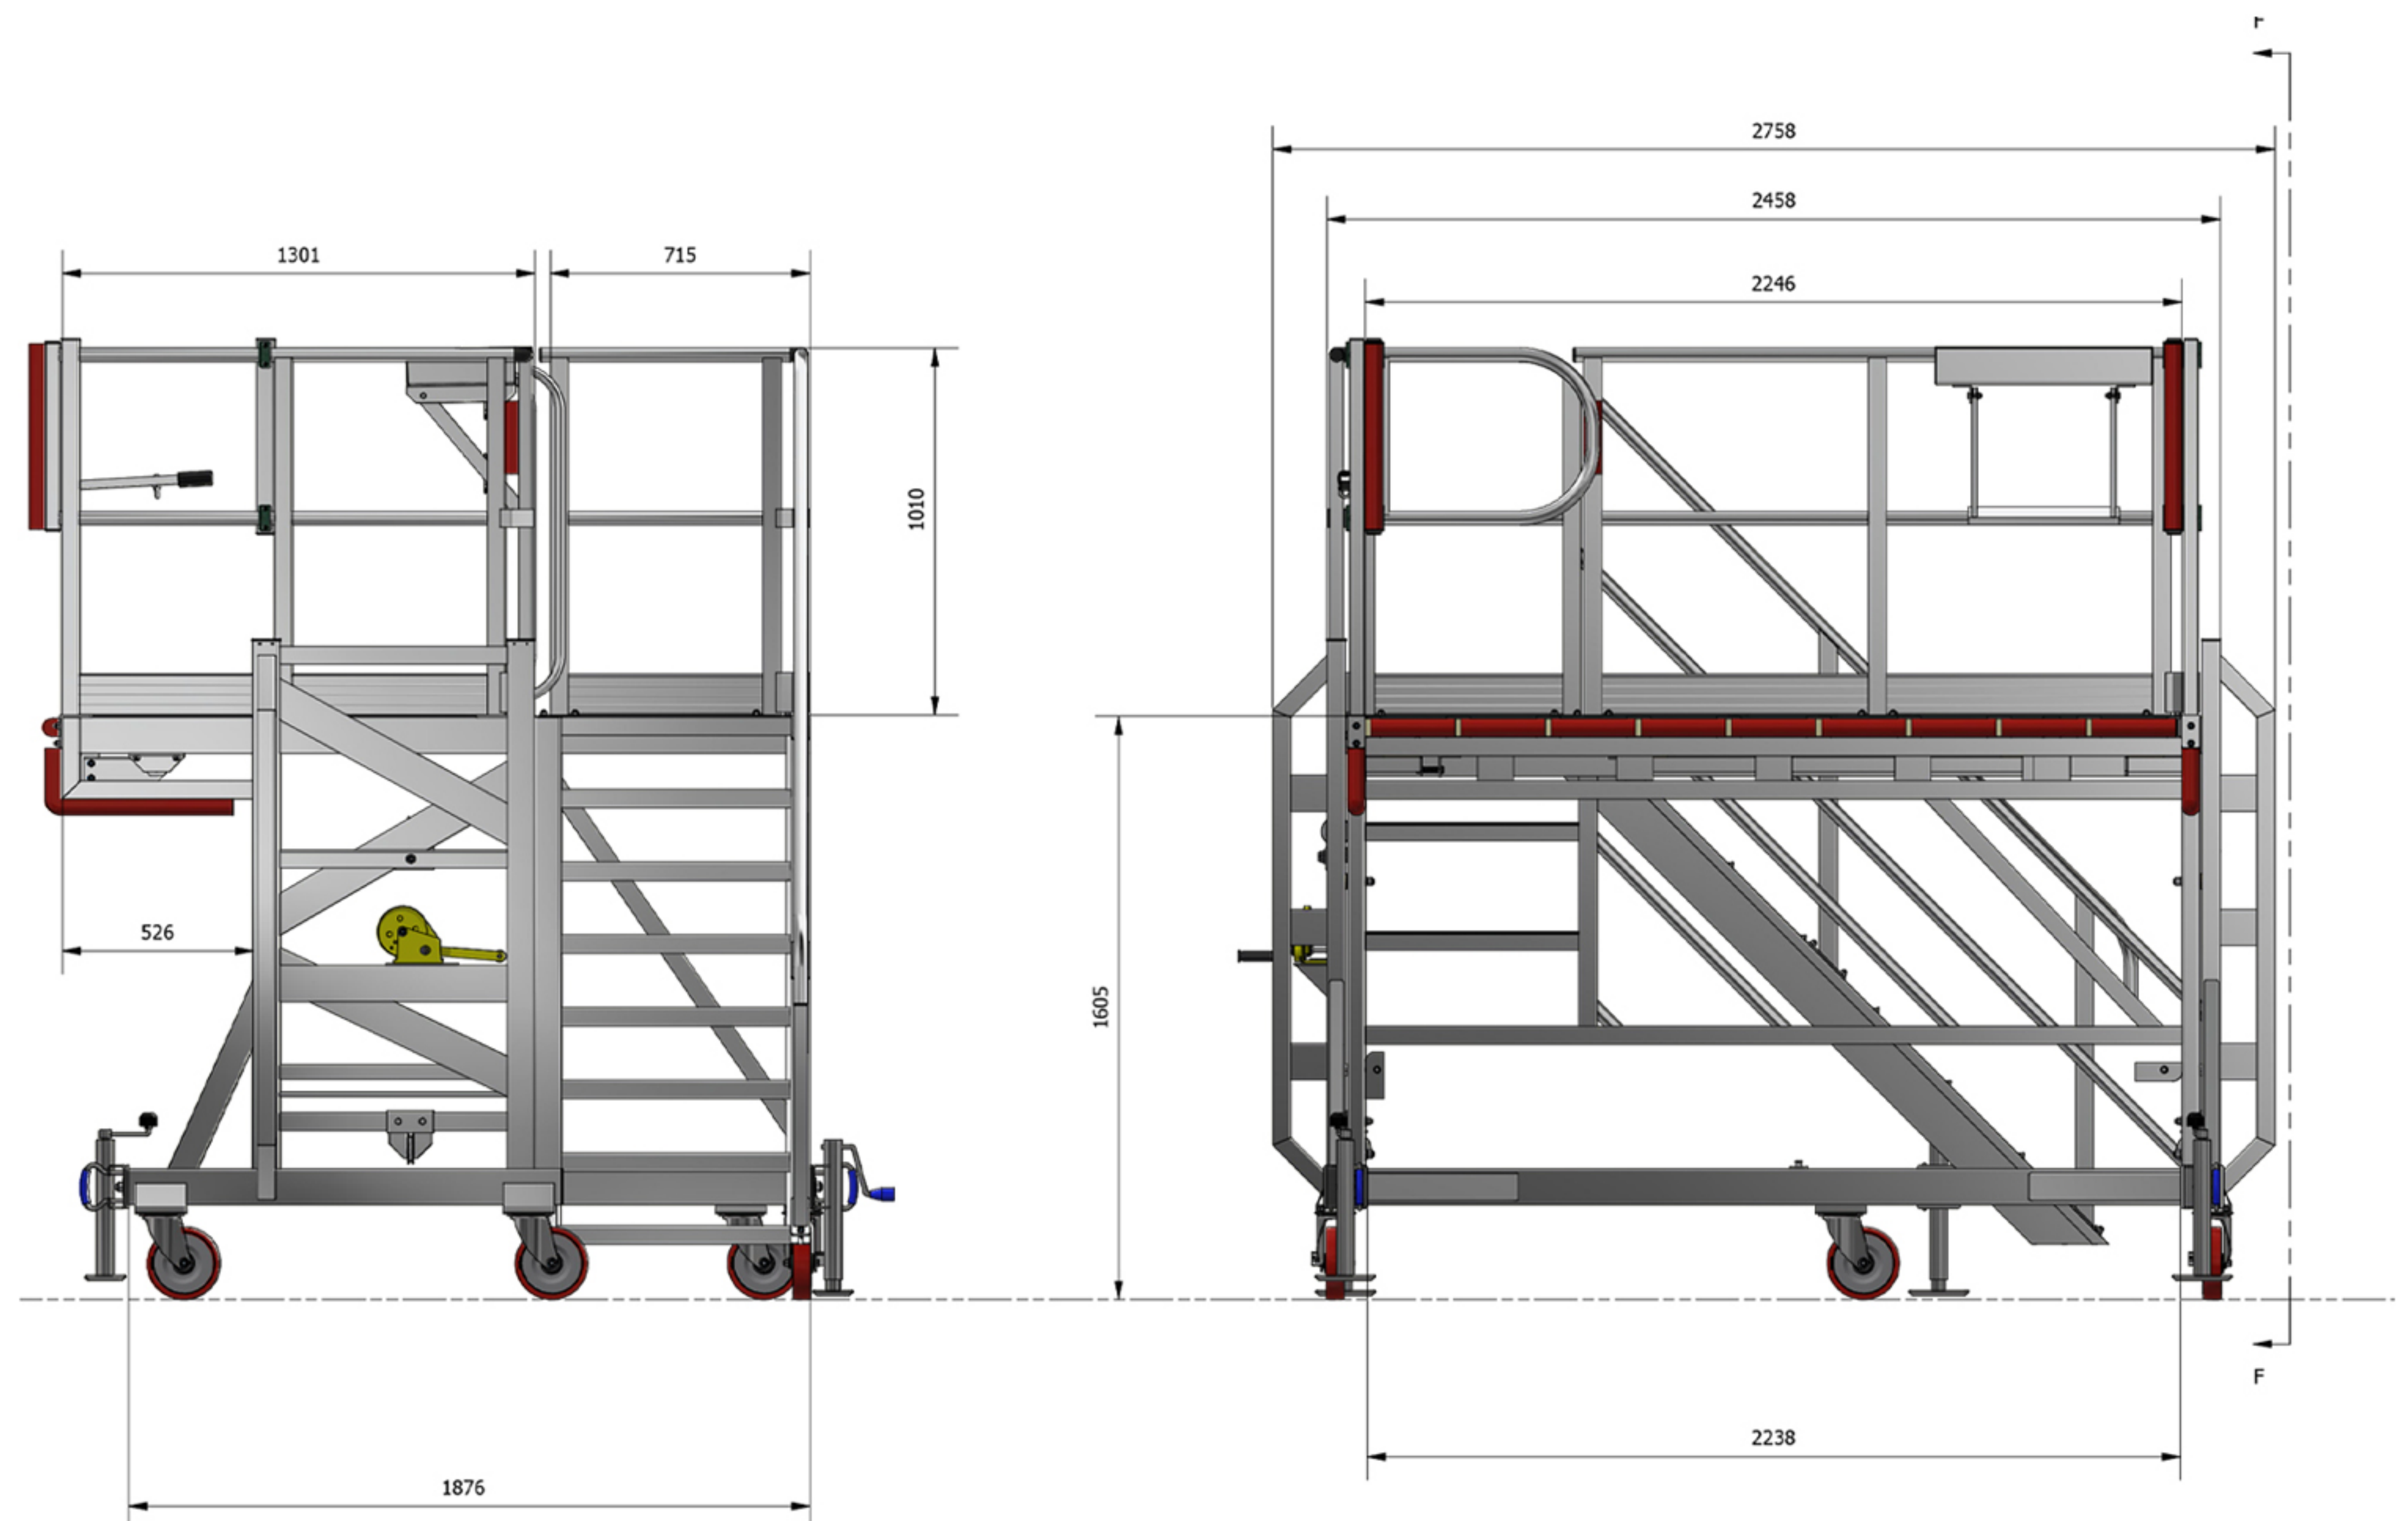

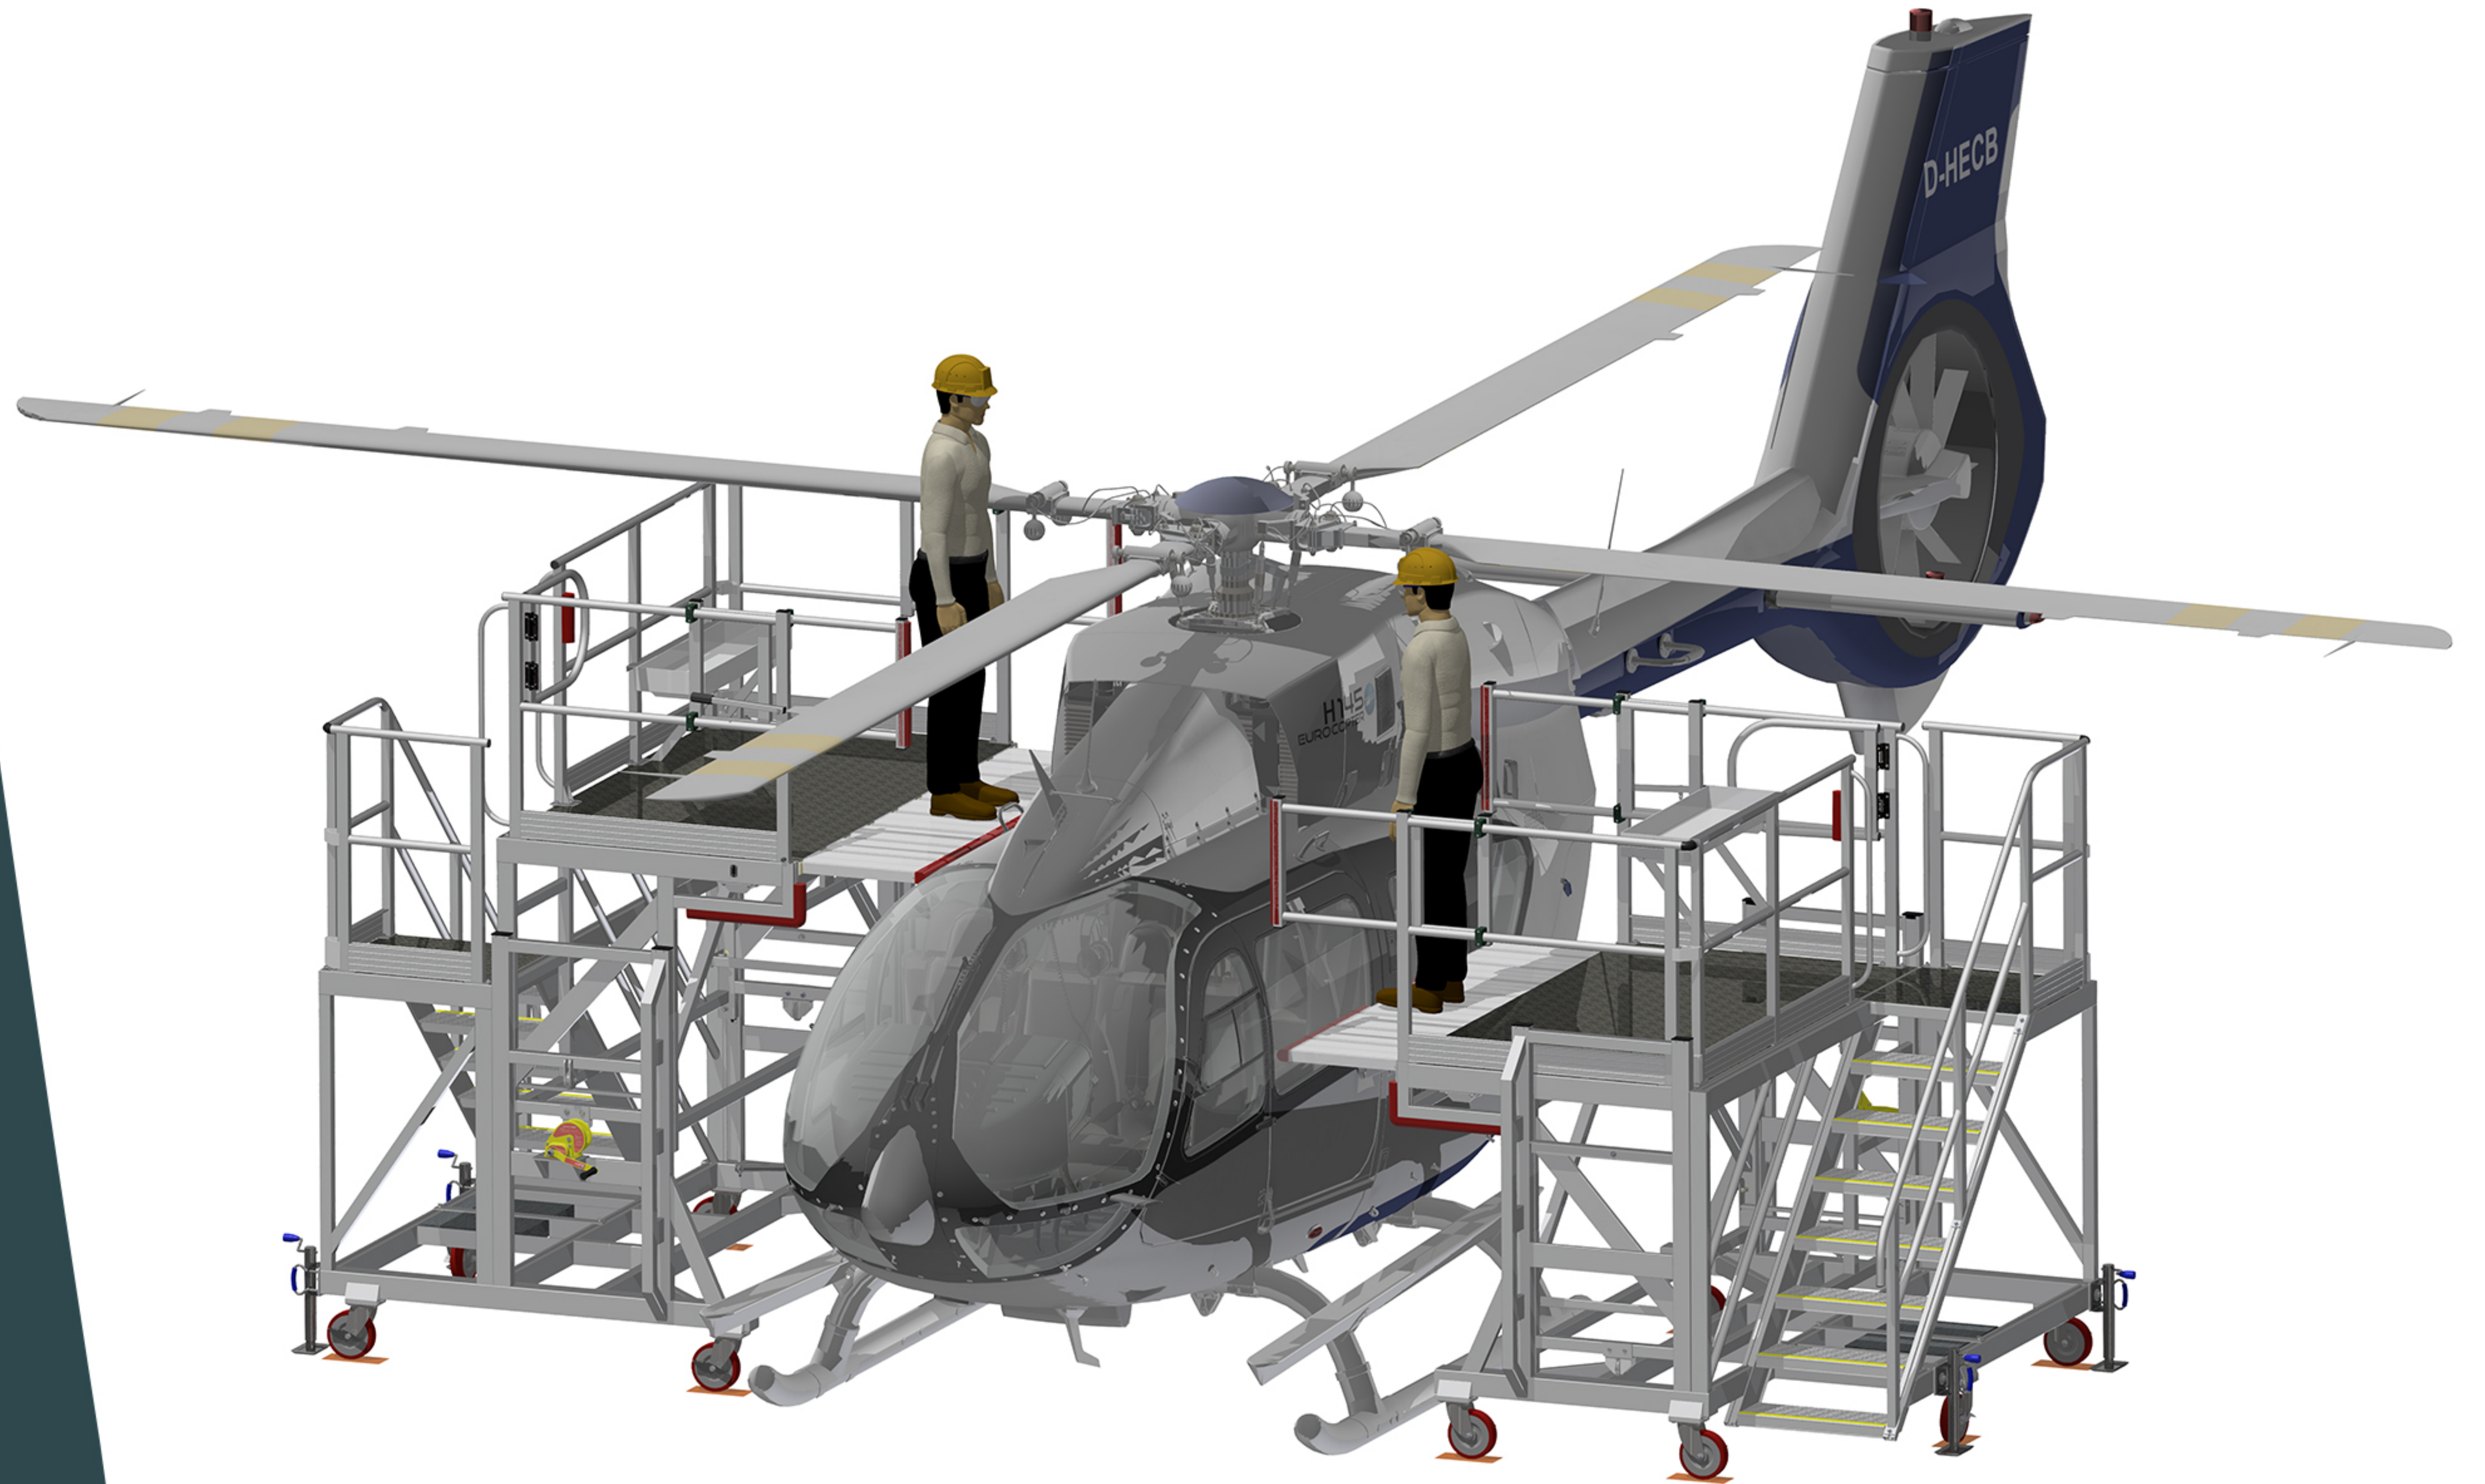

CONFIGURABLE SOLUTIONS

HEIGHT-ADJUSTABLE PLATFORM W/ SLIDER RAILS

This robust maintenance platform is height adjustable, with configurable sliders - allowing it to conform to all helicopter & warplanes. It includes a parallel positioned stair for the most compact footprint - enhancing abilities in hanger spaces and for transport.

COMPACT SOLUTIONS

EASYRAISE - THE ADJUSTABLE, MOBILE WORK PLATFORM

The EasyRaise Adjustable Mobile Work Platform is the ultimate solution for industries requiring safe, efficient, and versatile access to low-level heights. Built from high-grade aluminum, it offers exceptional strength, durability, and maneuverability, all while meeting stringent OSHA compliance standards. With an adjustable platform height ranging from 55" to 110", operated by a smooth manual winch system, the EasyRaise is designed for precision and ease of use. Its unique cantilevering feature allows the platform to extend further as it rises, providing enhanced access to challenging areas.

ADDITIONAL SOLUTIONS

SafeSmart Access provides access solutions across a wide range of industries, allowing us to adapt designs to fit specific access needs. Provided below are additional solutions for consideration in the Aviation & Defense Industry. To learn more, please contact our sales team and we can tailor our products to your specific needs.

Side-Access Platforms (Slimline & Wide)
Large, uninterrupted work space under platform, allowing access to doors while the platforms are in position.

Side Maintenance Stand
Lightweight, cantilevered side platforms.

ProScaf
Our unique system in steel and aluminum, for creating fully configurable and customizable work platforms with large cantilevers and bridging portions.

Eurocopter Platforms
Adaptable dual-level access for maintenance tasks around the engine bay and lower rear of the fuselage.

Wrap-Around Tail Dock (Small & Large Sizes)
Close "U-Shape" access around the tail during rotor checks and maintenance.

Mobile Docking System
Full-Surrounding platform for rotor access with a wide platform for tool storage.

Side & Tail Platforms
Fully surrounded side and nose access, with a full tail rotor access that is customizable for any rotary aircraft.

Side Access Stands
Custom aluminum, mobile platforms to safely access EC130 & similar aircraft.

Dual Access Tail Dock
Stairs fitted to both sides of platform, for uninterrupted tail access.

Black Hawk Full-Surrounding Docking System
Fully surrounded platform with side, top, engine bay, and tail access for heavy maintenance tasks.

Rotor Blade Stand
Customizable, wheeled stand to suit any type of rotor blade.

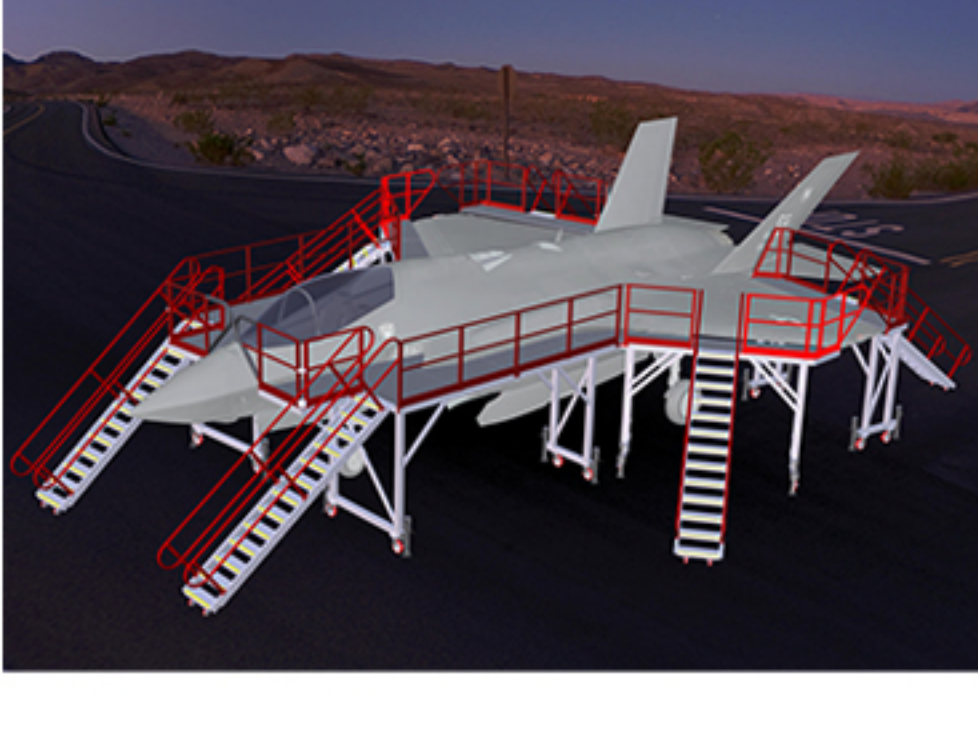

General Service Platform
Dual-Level platform for access to main service areas of the aircraft.

Flight Line Stands
Large cantilever for reaching over aircraft mobile dolly and access work area.

Side Access Platforms
A twin-mirrored system that is easily wheeled into place, with dual-level access to junction of fuselage and tail, as well as top engine bay.

F-35 Docking Stand
A fully surrounding platform that allows access to all areas simultaneously, with unique advantages like self-levelling stairs and height adjustment in the dock to suit different ramp loadings of the F35.

Heavy Maintenance Stand
Fully surrounded platform for rotor access, with a wide platform for tool storage.
